

## Using Freemake Video Downloader

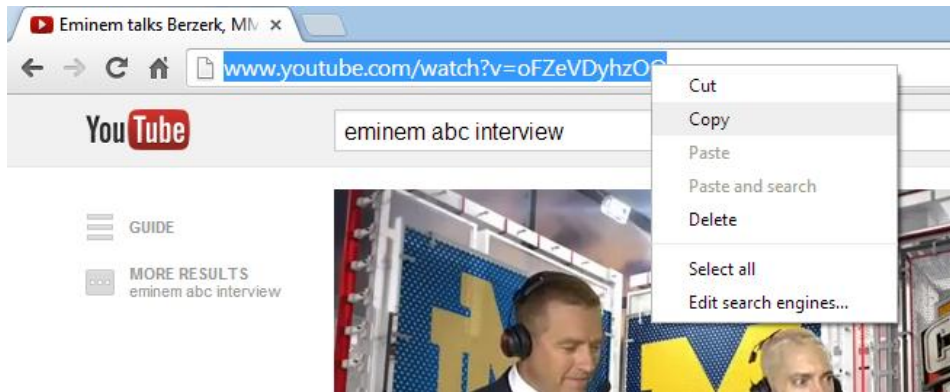

1. Run Freemake Video Downloader
  - a. Start – All Programs – Freemake – Freemake Video Downloader

2. Launch the YouTube you wish to download

3. Copy the URL by highlighting the address then Right Click – Copy

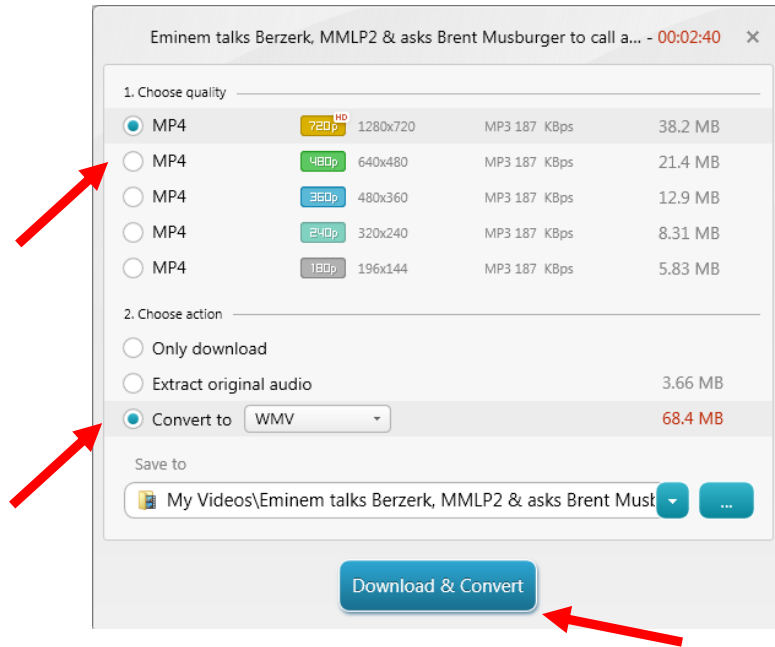

4.

5. Then Paste URL in the Freemake Video Downloader

6. Choose Quality (resolution) then if you wish to convert. Converting to WMV will ensure it will play on all teaching stations. Then click Download & Convert.

7. Find your file. Clicking on Show in Folder will open the folder the video was downloaded to. At this point, you can copy/paste the file onto a flash drive or your U drive (U drive has a limit of 2 GB).
